

# Loan Acceptance Patterns by Age and Income

Loan Acceptance Rate by Age

Loan Acceptance Rate by Income

Loan Acceptance Rate by Age and income\_order

## Trends:

### 1 By Age

Loan acceptance rates generally increase with age. The 60–69 group has the highest rate, while 30–49 shows a slight dip.

### 2 By Income

Acceptance rates rise with income. The 150k+ group leads, while those under 30k are least likely to be approved.

### 3 By Age & Income

Across all age groups, higher income consistently leads to higher acceptance rates. The combined effect is strongest for older, high-income individuals.
